

# Contents of Volume 6, 1983

**Number 1** issued in June 1983

---

## **Immunopathology of Idiotypic Interactions**

**Guest Editor: P. H. Lambert**

---

- 1 **J. Urbain:** Introduction
- 7 **K. Eichmann, K. Fey, R. Kuppers, I. Melchers, M. M. Simon, H. U. Weltzien:** Network Regulation Among T Cells; Conclusions from Limiting Dilution Experiments
- 33 **M. Goldman, J. C. Renversez, P. H. Lambert:** Pathological Expression of Idiotypic Interactions: Immune Complexes and Cryoglobulins
- 51 **I. M. Roitt, D. K. Male, A. Cooke, P. M. Lydyard:** Idiotypes and Autoimmunity
- 67 **A. D. Strosberg:** Anti-Idiotypic and Anti-Hormone Receptor Antibodies
- 79 **D. L. Sacks, G. H. Kelsoe, D. H. Sachs:** Induction of Immune Responses with Anti-idiotypic Antibodies: Implication for the Induction of Protective Immunity
- 99 **G. T. Stevenson, F. K. Stevenson:** Treatment of Lymphoid Tumors with Anti-Idiotypic Antibodies

**Indexed in Current Contents**

**Number 2/3** issued in September 1983

---

## **Complement (I)**

**Guest Editor: H. J. Müller-Eberhard**

---

- 117 **H. J. Müller-Eberhard:** Introduction
- 119 **G. Fey, H. Domdey, K. Wiebauer, A. S. Whitehead, K. Odink:** Structure and Expression of the C3 Gene
- 149 **H. R. Colten:** Molecular Genetics of the Major Histocompatibility Linked Complement Genes
- 159 **D. T. Fearon:** The Human C3b Receptor
- 173 **W. O. Weigle, M. G. Goodman, E. L. Morgan, T. E. Hugli:** Regulation of Immune Response by Components of the Complement Cascade and Their Activated Fragments
- 195 **N. R. Cooper, G. R. Nemerow, J. T. Mayes:** Methods to Detect and Quantitate Complement Activation
- 213 **R. J. Ziccardi:** The First Component of Human Complement (C1): Activation and Control
- 231 **J. S. Sundsmo, D. S. Fair:** Relationships Among the Complement, Kinin, Coagulation and Fibrinolytic Systems

**Indexed in Current Contents**

## Number 4 issued in December 1983

---

### Complement (II)

Guest Editor: H. J. Müller-Eberhard

---

- 259 **B. F. Tack:** The  $\beta$ -Cys- $\gamma$ -Glu Thiolester Bond in Human C3, C4, and  $\alpha_2$ -Macroglobulin
- 283 **H. P. Hartung, U. Hadding:** Synthesis of Complement by Macrophages and Modulation of Their Functions Through Complement Activation
- 327 **N. R. Cooper, G. R. Nemerow:** Complement, Viruses, and Virus-Infected Cells
- 349 **E. J. Brown, K. A. Joiner, M. M. Frank:** The Role of Complement in Host Resistance to Bacteria
- 361 **W. D. Ratnoff, D. T. Fearon, K. F. Austen:** The Role of Antibody in the Activation of the Alternative Complement Pathway
- 373 **U. E. Nydegger, M. D. Kazatchkine:** The Role of Complement in Immune Clearance of Blood Cells

Indexed in Current Contents

## Author Index of Volume 6, 1983

- Austen K. F. 361  
Brown E. J. 349  
Colten H. R. 149  
Cooke A. 51  
Cooper N. R. 195, 327  
Domdey H. 119  
Eichmann K. 7  
Fair D. S. 231  
Fearson D. T. 159, 361  
Fey G. 119  
Fey K. 7  
Frank M. M. 349  
Goldman M. 33  
Goodman M. G. 173  
Hadding U. 283  
Hartung H. P. 283  
Hugli T. E. 173  
Joiner K. A. 349  
Kazatchkine M. D. 373  
Kelsoe G. H. 79  
Kuppers R. 7  
Lambert P. H. 33  
Lydyard P. M. 51  
Male D. K. 51  
Mayes J. T. 195  
Melchers I. 7  
Morgan E. L. 173

Weltzien H. U. 7  
Wiebauer K. 119  
Whitehead A. S. 119  
Ziccardi R. J. 213

## Index - 1983

- $\alpha_2$ -macroglobulin ( $\alpha_2$ M) 260
- acetyl choline (ACh) receptor, autoantibody 56
- acute phase reactants 140
- African trypanosomiasis 41
- anaphylatoxin, low zone desensitization 316
- anaphylatoxin C3a 313
- animal lymphoma, immunotherapy of 108
- anti-adrenergic ligand 69
- antibodies against insulin 68
- antibody-coated target cells 383
- antigen-specific T suppressors 62
- antiglobulins 53
- anti-idiotypic antibodies 79, 99
  - , therapeutic 76
  - , myasthenia gravis 72
- anti-idiotypic suppression 60
- autoantibody 368
- autoimmune hemolytic anemia 380
- autoimmunity 51
- $\beta$ -adrenergic receptor 69
- $\beta$ -Cys- $\gamma$ -Clu thiolester bond 260
- B, D and P synthesis 293
- B lymphocytes 161
- bacterial LPS 39
- biosynthesis 150
- biosynthesis, complement 286
- Burkitt's lymphoma 101
- C1 214, 233
- C1 activation 216
  - , molecular mechanism 217
- C1 function, control of 220
- C1-inhibitor (C1-In) 218
- C1 synthesis 286
- C2 149
- C3 238
- C3a, suppressive activity 182
- C3b, covalent binding 260
- C3b receptor 159, 377
- C3 deficiencies, inherited 135
- C3 gene 121
  - , expression control 128
- C3 nephritic factor (C3NeF) 368
- C3 synthesis 295
  - , acute inflammation 140
- C4 149
- C5 238
- C5a, immunopotentiating 188
- C5a receptors 175
- C5 synthesis 293
- cDNA 152
- chromosome 19 133
- chronic lymphocytic leukemia (CLL) 100
- C1q based assays 200
- coagulation 239
- complement
  - , activated components of 173
  - , biosynthesis 286
  - , alternative pathway 361
  - , biosynthesis 286
  - , -, genetic control 305
  - , "innocent bystander" deposition 385
  - , labile binding site 260
  - , resistance to bacteria 349
- complement activation, antibody 361
- , detection and quantitation of 202
- , macrophage functions 310
- , viruses 330
- , virus-infected cells 338
- complement component cleavage, measurement of 203
- complement component levels, measurement of 187, 195
- complement-dependent lysis, virus-infected cells 339
- complement receptors, macrophages 308
- complement secretion regulation 300
- complement synthesis, rodent macrophages 285
- complement synthesis, human mononuclear phagocytes 297
- complement system 173, 373
- CR + lymphocytes 181
- cross-reactive idiotypes 51
- , autoimmune diseases 53
- cryoglobulins 33
- cryoglobulinemia, essential, idiotypic interactions in 45
- cryo-IgC, clonal restriction 45
- cycloheximide 286
- cytotoxic antibody derivatives, development of 111
- DNA autoantibodies 54
- DNA sequence analysis 126
- erythrocytes 161
- essential cryoglobulinemia, idiotypic interactions in 45
- Factor B 149, 318
- Factor E 320
- fibrinolysis 233
- follicular lymphoma 100
- formyl peptide chemoattractant receptor 73

- gene mapping 132  
gene structure 121  
genetic deficiencies 151  
glomerular podocytes 161  
glomerulonephritis, immune complex 42
- human lymphoma, immunotherapy of 108  
hypergammaglobulinemia 38
- idiopathic thrombocytopenic purpura (ITP) 392  
idiotypes, cross-reactive 51  
idiotype-anti-idiotype immune complexes, natural occurrence 36  
idiotype-bearing molecules, antigen-binding activity 93  
idiotype intervention, autoimmune disease therapy 60  
idiotypes, "silent" 84  
idiotypic interactions 33, 42, 51, 67, 79, 99  
-, essential cryoglobulinemia 45  
-, idiotypic interactions 42  
idiotypic manipulation 89  
idiotypic regulation 9  
IgD 103  
IgM 103  
Ig metabolism 101  
immune complexes 33, 361  
immune complex assays 200  
immune complex glomerulonephritis 42  
-, idiotypic interactions 42  
immune responses 79  
-, regulation 173  
immunohematology 374  
immunopotential, C5a 188  
immunoregulation 6  
immunotherapy, lymphoma 108  
insulin receptors 68  
interleukin-1 188
- Kallikrein 239  
kinin 239
- labile binding site, complement 260  
leukocytes 240  
LPS, bacterial 39  
lymphocytic leukemia, chronic (CLL) 100  
lymphoid tumours 99  
lymphokine 173  
lymphoma, animal, immunotherapy of 108  
-, Burkitts 101  
-, human, immunotherapy of 108  
-, non-Hodgkin's (NHL) 101
- macrophages 173  
-, complement receptors 308  
-, alveolar 286  
-, human and monkey 286  
-, peritoneal 286  
-, rodent, complement synthesis 285  
macrophage activation 300, 303  
macrophage functions 284  
-, complement activation 310  
major histocompatibility complex (MHC) 149  
mammalian cells 365  
messenger RNA 151  
monocytes 161  
monocyte activation 292  
myasthenia gravis, anti-idiotypic antibody 72  
myeloma 99  
myeloma proteins 34  
myotonic dystrophy 133
- nephritic factor, C3 (C3NeF) 368  
network interactions 57  
neutropenia 388  
neutrophils 161  
non-Hodgkin's lymphoma (NHL) 101  
NZB/W mice 55
- opsonins 349
- paroxysmal nocturnal hemoglobinuria (PNH) 387  
phagocytic cells 349  
phagocytosis 304  
plasmin 233  
polyclonal B cell activation 38  
precursor frequencies, T effector cells 13  
prostaglandin E 311
- receptor, formyl peptide chemoattractant receptor 73  
receptor antibodies, anti-hormone 67  
-, anti-idiotype 67  
receptors, C5a 175  
receptors, complement, macrophages 308  
recurrent idiotypes 80  
red cell autoantibodies 56  
REP receptor 72  
reticuloendothelial system (RES) 375  
-, bacterial clearance 350  
retinol-binding protein (RBP) 72  
rodent macrophages, synthesis of complement 285
- "silent" idiotypic repertoire, induction of 84  
splenectomy 353  
systemic lupus erythematosus (SLE) 59, 167
- T cells 164  
-, antigen-inducible 19  
-, clonal selection 25  
-, network regulation 7

- T cells, non-immune, network suppression 27  
T cell bypass 58  
T effector cell, antigen-recognizing, precursor frequencies 13  
T suppressors, antigen-specific 62  
target neoplastic cells 100  
thiolester bonds 260  
thrombin 238  
thrombocytopenias 391  
thromboxane B<sub>2</sub> 311  
thyroglobulin (Tg) autoantibodies 55  
thyrotropin 72  
trypanosomiasis, African 41  
viral neutralization, complement-dependent 332  
virus-infected cells, complement-dependent lysis 339  
viruses, complement activation 330  
-, structural features 328  
Waldenström's macroglobulinemia 99  
*Xenopus* oocytes 155  
Zymosan 365
